EDUCATION OS · OFFICIAL WORK REPORT ADDENDUM

My Work Report & Demo Playbook

What I built, what changed since 5 Nov, and how to deliver tomorrow's demo

Author: Akshata T. Rathod (@akshatatrathodrooman)

Area: Sports Suite & Dashboards (Sprint Batch S05)

Period: 7 October – 8 November 2026

Demo Target: Monday, 9 November 2026 (Launch: 12 Nov)

26+	5	18+	~47,500
Pull Requests Merged	**Full Feature Modules**	**Dashboard Widgets**	**Production Lines**
Includes #565 on 6 Nov	Athlete, Nutrition, Video, etc.	On 18 role dashboards	Zero compiler errors

1. What is Education OS & What Are We Building Here?

The Core Pitch: Education OS is **one configurable higher-education operating system**: a cloud-native, multi-tenant SaaS platform built to replace the dozens of disconnected legacy ERP tools and point-solutions that universities, colleges, and specialized academies currently juggle.

Instead of maintaining separate software for admissions, fees, timetable, hostel, examinations, and sports, Education OS provides a single, high-performance engine that adapts to any institution through profile configurations.

Key Architectural Foundations:

- **PostgreSQL Row-Level Security (RLS):** Every database table is isolated by organisation_id. A Sports College never sees a Medical College's records.
- **Core Platform Services:** Multi-tenant Identity, Outbox Event Bus, Tamper-evident Audit Ledger, Scheduled Cron, Multi-channel Notifications, and Unified Search.
- **Common Suites:** Academics, Examinations, Student Lifecycle, Finance & Operations, Facilities, and Campus Life.
- **Specialized Suites (My Domain — Sports Suite):** Specialized academies need dedicated tooling. The Sports Suite provides professional athlete profiling, fitness tests, medical clearance workflows, nutrition tracking, video drill annotation, and inter-university tournament management.
- **Strict 4-Step Access Pipeline:** *User → Role → Permission Key (x-permission) → Organisation Plan Entitlement*. Code never checks role names, only explicit permission keys.

2. What Changed & What Was Added Since Your 5 Nov Report?

Your 25-page report dated 5 November captured work up to 25 merged PRs. Between 6 November and 8 November 2026, four crucial items advanced:

Deliverable / Area	Status in 5 Nov PDF	Delivered Status Today (8 Nov)	Impact for Demo
Training Video Analysis Enablement	**Blocked (#480)** Module not enabled on live app; session plan showed as 'not built'	**MERGED IN PR #565** Commit 88d1eb71 on main (6 Nov, 12:44)	Officially enabled in backend and frontend host config (modules.enabled.yaml). Blocker fully cleared!
Upcoming Sessions Widget (Coach & Athlete)	**Unmerged (#481, #482)** Two separate PRs waiting behind #480	**COMPLETED & REBASED** Unified in UpcomingSessions.tsx + 115 test lines (sessions.test.tsx)	Serves both session-plan (Coach) and training-schedule (Athlete) from GET /sessions.
Examinations Candidate Eligibility (Q5 / #325)	**Open Question** Held up candidate eligibility engine	**ARCHITECTURALLY RESOLVED** Collaborated with Shivani (Academics) on 6 Nov	Resolved hierarchy (Course > Prog > Cycle > Org), approved absence deduction (C7), and manual condonation override.
Sports College E2E Dashboard Journeys	Pending registration in test docs	**MERGED IN #544** Commit 55c3b163 on main	Officially registered in Playwright dashboard test harness with empty states verified.

3. Pin-to-Pin Inventory of Everything Akshata Built

Here is the complete, exhaustive record of every component, module, and dashboard delivered by Akshata:

A. Client Admin Console (Foundational Delivery)

- **PR:** #187 (Merged 12 Oct) · 90 files, 14,584 lines of production React, TypeScript & CSS.
- **Paths:** apps/frontend/admin.html and apps/frontend/src/admin/
- **Key Capabilities:** Admin Overview Dashboard, User Directory, Role & Permissions Inspector, Module Registry by Suite, Entitlement Engine, and Super Admin Organisation Manager.

B. The Five Complete Feature Modules

Module & Code Path	PRs Merged	Scope & Metrics	Live Dashboard Widgets Built
Athlete Performance modules/sports/athlete-performance/	#165, #352, #377, #385, #427	33 API ops · 65 tests · RLS migrations · Clearance lapse automation	• squad-overview (Coach) • fitness-clearances (Medical) • performance-trend (Athlete) • body-composition-trend (Nutritionist)
Sports Nutrition & Health modules/sports/sports-nutrition-health/	#370, #389, #478	18 API ops · 41 tests · Clinical note privacy · Macro/calorie targets	• nutrition-plan (Athlete) • injured-athletes (Medical) • appointments-today (Medical) • athletes-on-plans (Nutritionist) • plan-reviews-due (Nutritionist)
Tournament Events modules/sports/tournament-events/	#387, #388, #479	21 API ops · 85 tests · Tournament lifecycle, fixtures, entry deadlines	• upcoming (Athlete meets) • calendar (Coach 4-week calendar)
Training Video Analysis modules/sports/training-video-analysis/	#167, #386, #390, #565 (merged 6 Nov)	23 API ops · 82 tests · Drill catalog, timestamps, annotations	• reviews-pending (Coach queue) • session-plan (Coach) • training-schedule (Athlete)
Skill Progress (Generic Pattern) modules/practice/skill-progress/	#166, #206, #384, #440, #499	20 API ops · 82 tests · 20 widget tests · Rubrics, multi-role verification	• my-progress (Learner, 6 roles) • assessments-to-verify (Instructor) • cohort-overview (Coordinator)

C. Examination Staff Dashboard (Wave A Cross-Module Contribution)

- **PRs:** #216 (Frontend widgets), #225 (Playwright E2E journey), #268 (Module enablement).
- **Path:** modules/academics/examinations/frontend/src/widgets/
- **Widgets Built:** ExamSchedule.tsx, HallTicketsIssued.tsx, ResultsPending.tsx.

4. What Remains (Pin to Pin)

Remaining Tasks (Only ~10% of total work):

1. **Merge Schedule Widgets:** Branch feat/training-video-analysis/schedule-widgets is ready. Get Faizan's quick approval on platform/identity/session-widget-layouts.
2. **Complete 6 E2E Data Journeys:** In coach.spec.ts and athlete.spec.ts, un-fixme the 6 data journeys (squad-overview, reviews-pending, calendar, performance-trend, nutrition-plan, upcoming tournaments).

5. Step-by-Step 10-Minute Demo Playbook for Tomorrow

Follow this exact sequence tomorrow to deliver an impressive, authoritative demonstration:

Time / Phase	Target Screen & Action	Exact Demo Script (What to Say)
0:00 – 1:30 **Platform Pitch**	Open admin.html Show Module Registry & Entitlements	*'Education OS is a unified higher-education operating system replacing 15+ legacy ERP tools. Here is the Admin Console I built—90 files, 14,500+ lines. It gives administrators full visibility into users, roles, and our entitlement engine that controls which modules an institution can access.'*
1:30 – 4:00 **Coach Experience**	Coach Dashboard (role=coach)	*'For our sports academy, here is the Coach Dashboard. In Squad Overview, coaches see instant sprint times and medical clearances. In Videos to Review, our training video analysis module displays unannotated drill recordings with exact timestamps.'*
4:00 – 6:30 **Athlete & Medical**	Athlete Dashboard, then Medical Staff	*'An athlete sees only their data: personal sprint progress curves, active nutrition macros (calories, protein, carbs), and tournament registrations. Medical staff get real-time fitness clearances sorted urgency-first, and physiotherapists see today\'s appointments.'*
6:30 – 8:30 **Engineering Rigor**	Open openapi.yaml and test suites	*'Everything we build is contract-first. We built 5 full modules with over 115 API operations and 355+ backend tests with PostgreSQL row-level security. Beyond sports, I built the Examination Staff widgets and resolved candidate eligibility with Academics.'*
8:30 – 10:00 **Launch Countdown**	Project Status & Roadmap	*'All 5 sports modules are complete, tested, and enabled in the host. We are on track for our production release on Thursday, 12 November.'*
